FULL STACK DEVELOPER

Enthusiastic junior programmer skilled in Java, PHP, and JavaScript, with hands-on experience in game development and web programming. Eager to join Legoom Company, contributing technical expertise and teamwork to drive innovation. Committed to continuous learning and excited to apply my coding abilities to impactful projects, while embracing opportunities for growth within the dynamic tech landscape.

KEY COMPETENCIES

Programming

Growth

PROFESSIONAL EXPERIENCE

FullStack Developer

As a proactive student, I successfully applied my programming skills in various projects, contributing to the development of interactive web applications and demonstrating a keen eye for detail in debugging and refining code.

Accomplishments:

- Through hands-on coursework, I honed my proficiency in Java, PHP, and JavaScript, applying these languages to create user-friendly web interfaces and participating in coding challenges that enhanced my logical thinking.
- Harnessed my proficiency in PHP and Laravel to develop robust web applications, leveraging the framework's MVC architecture and eloquent ORM for streamlined database management and dynamic content generation.
- A strong advocate for continuous learning, I proactively delved into Laravel's ecosystem, exploring Composer for dependency management, participating in artisan command-line tool workshops, and contributing to open-source Laravel packages

Programming Tutor

Guiding aspiring programmers, I facilitated engaging sessions where I demystified complex algorithms, data structures, and object-oriented principles, empowering students to write efficient and maintainable code.

Accomplishments:

- Through patient and interactive instruction, I provided hands-on guidance in languages such as Java, PHP, and JavaScript, helping students grasp foundational programming paradigms and equipping them with practical problem-solving skills.
- I collaborated with students to develop real-world applications using frameworks like Laravel, guiding them through the process of building dynamic web solutions and imparting valuable insights into best practices and industry trends.

EDUCATION

Sekolah Kebangsaan Bandar Endau

Graduated with 4A 1B in UPSR

Sekolah Menengah Agama Rompin

Completed SPM with 7A grades, along with 1B and 1C grade.

Uitm Cawangan Johor Kampus Segamat

Outperformed my peers in programming algorithms and proficiency in problem-solving.

TECHNICAL TOOLS

- Programming Languages : Java,PHP,Javascript
 - Frameworks : Laravel,Unity
 - Frontend Development : HTML,CSS,Tailwind,Bootstrap,ReactJs
 - Version Control : Git ,Github
 - Integrated Development Environments (IDE) : Visual Studio Code, Visual Studio
 - Database Management : MySql
 - Tools : Composer,Node package manager
 - Operating System : Windows ,Kali Linux
-

PROJECTS

My Main Portfolio
